

Ahmed Youssef

Machine Learning & Data Science Student | Open to Internships & Remote Roles

✉ ay1751765@gmail.com ☎ +20 155 832 4948 in Ahmed Youssef ahmed18y 📍 Alexandria, Egypt

SUMMARY

Second-year Computer and Data Science student at Alexandria University (GPA 3.66/4.0) focused on machine learning, data mining, and applied analytics. Built live data products and academic ML pipelines using Python, scikit-learn, Pandas, and SQL. Seeking machine learning, data science, or data analyst internships, including remote opportunities.

TECHNICAL SKILLS

Languages:	Python, Java, R, SQL, JavaScript, HTML, CSS, C#
ML / Data Science:	scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, EDA, Classification, Regression, Clustering, Feature Engineering, Data Mining, K-Means, DBSCAN, Association Rules
Tools & Cloud:	Git, GitHub, Jupyter, Google Colab, VS Code, AWS Academy Cloud Foundations, Vercel, Netlify

PROJECTS

| LIVE DEPLOYED PRODUCTS

Financial Intelligence Platform

Python | Data Analysis | Role-Based Access | Dashboard | Vercel

- Multi-user financial dashboard with admin/analyst roles, authentication, and interactive visualizations for data-driven decisions.

REV ORA - Automotive E-Commerce Platform

HTML | CSS | JavaScript | Arabic UI | Netlify

- Responsive e-commerce site for genuine VW Group spare parts with product catalog and Arabic-localized interface.

Fitness Coach Personal Branding Website

HTML | CSS | JavaScript | Responsive Design | Vercel

- Client portfolio site with training plans, transformation gallery, animations, and WhatsApp integration.

| ACADEMIC

Unified Scouting System - ML Analysis

Python | scikit-learn | Pandas | Classification | Regression | Clustering

- FIFA player scouting analysis with supervised/unsupervised models and performance evaluation.

Car Price Prediction - End-to-End ML

Python | scikit-learn | Pandas | EDA | Predictive Modeling

- End-to-end pipeline: data cleaning, EDA, feature engineering, and price prediction with model evaluation.

Cardiovascular Disease - Data Mining

Python | R | K-Means | DBSCAN | Association Rules | Classification

- Health risk pattern discovery using clustering, association rules, and evaluation with EDA visualizations.

Flight Booking System

Java | OOP | GUI | Data Structures

- Java GUI reservation system with admin, agent, and customer roles for search, booking, and accounts.

15-Puzzle AI Solver with A*

Python | A* Search | Manhattan Heuristic | AI Problem Solving

- A* solver with Manhattan distance heuristic for optimal 15-puzzle solutions.

EDUCATION

Alexandria University - Faculty of Computer and Data Science

B.Sc. Computer and Data Science | 2nd Year | Expected Graduation: 2028

Coursework: Machine Learning, Data Mining, Data Structures & Algorithms, Linear Algebra, Probability & Statistics, Numerical Methods, Programming, System Analysis & Design, Financial Planning, Accounting, Intro to Business

GPA: 3.66 / 4.0

Alexandria, Egypt

CERTIFICATIONS

AWS Academy Cloud Foundations - AWS Academy

2024

ACHIEVEMENTS

- Deployed **3+ live production applications** (Vercel, Netlify) as a 2nd-year student.
- Maintained **3.66/4.0 GPA** while completing ML, Data Mining, and advanced mathematics coursework.
- Published **6+ GitHub repositories** across ML, data mining, and Java software engineering.

LANGUAGES

Arabic: Native English: B1 (Intermediate)
